“The global ecotourism market size was valued at USD 185.87 billion in 2021 and is expected to expand at a compound annual growth rate (CAGR) of 15.2% from 2022 to 2030. The growth is mainly driven by the rising popularity of immersive travel, outdoor recreational activities, and solo traveling coupled with rapid urbanization and the availability of cheap flights. The growing awareness about the adverse impact of tourism on the environment such as water pollution, soil erosion, and habitat loss has prompted sustainable tourists and government authorities to promote ecotourism and contribute to the growth of the industry.” [Ecotourism Market Size, Share & Growth | Global Report, 2030 \(grandviewresearch.com\)](#)
